

# Readypower Group PWI Presentation

Russell Jack CEO Readypower Group

**READYPower**  
GROUP

# Readypower Group Structure and Operating Companies

# Complete Drainage & Earthworks Solution

Readypower Group can offer a full solution to drainage and earthworks in house utilising our own engineers, safety critical staff, haulage and rail construction machines

## **READYPOWER**

### COMPLETE DRAIN CLEARANCE

- Undertake CCTV surveys of existing drainage networks and assess condition
- Deploy Jet Vactor Unit to unblock and clean
- Provide client with detailed map showing any areas of collapse
- Consult with Readypower Terrawise engineering team for solution

## **READYPOWER**

### TERRAWISE

- Work with the client to arrange site visit to assess requirement
- Arrange possession and plant to undertake the works
- Provide detailed design for new drainage installation
- Undertake the drainage renewal as a package job with in-house resources

## **READYPOWER**

### RAIL SERVICES

- Undertake a site visit with RTL and conduct a full POS survey
- Provide a full POS pack to site including lift planning and supervision
- Provide haulage, delivery and management of all rail plant machines
- Provide onsite plant management for duration of the job

# Readypower Jet Vactor

- Designed and built by Readypower Group in conjunction with AJH
- Cost just under £1m each
- Six machines on the fleet with a further two min build to be delivered in March 2024
- High power vacuum to suck out existing drainage systems with a 6-tonne capacity tank to take away debris
- High power jetting system with a 4500-litre capacity tank to store water
- Hired with a specialist 3-man team.
- Client will get full map of work completed with any issues so that further works can take place

# Readypower Jet Vactor

Jet Vactor can work with other RRV fleet to take away spoil and continue to work
