

With sincere thanks to John Merriman for providing this photograph and kindly granting us permission to use it.

RailEI TECHNICAL SEMINAR

ELECTRIFICATION: INVESTMENT, MAINTENANCE, RENEWALS, RESEARCH

10 SEPTEMBER 2026

KNOWLEDGE 200
ELECTRIFICATION
& PLANT

HILTON, LIVERPOOL

WE ARE DELIGHTED TO ANNOUNCE THAT OUR 2026 ELECTRIFICATION SEMINAR WILL BE HELD IN LIVERPOOL

The North West provides a wonderful setting for the Railway Engineering Institution (RailEI) to explore a selection of key themes in Rail Electrification; the region is currently undergoing a renaissance in terms of the development of Integrated Transport Strategies and so has much to offer RailEI Members and supporters. There are many examples of developing and ongoing projects and programmes including expansion of the Merseyrail network, the West Coast mainline renewal and maintenance challenges, Transpennine Route Upgrade (TRU) and Manchester Metrolink extensions and a diverse spread of AC and DC traction and contact systems. We will also be covering recent developments in Ireland and changes to rail standards, providing safer isolation strategies.

This is the ideal location for us to discuss the best of industry developments and practices and share them with our colleagues.

DO YOU HAVE A PAPER TO SUBMIT?

RailEI are calling for papers from Members and supporters on the above themes to be presented at this Seminar.

BOOKING NOW OPEN:
www.railei.org

£97 MEMBER
£177 NON-MEMBER
£20 STUDENTS

Sponsorship and exhibition spaces available.
